Introduction

I am excited to take this new role in 2020 and I am proud of working with a great Editorial Board. Global Journal of Chemical Sciences (GJCS) is an international, multidisciplinary open access, peer-reviewed bi-annual journal which publishes authentic and real findings covering all the broad research areas of Chemical Sciences. Our journal aims to promote information in research and enhance standards of scientific literacy among peers, which could in turn aid in providing improved healthcare.

As an Editorial Board Member of GJCS, I believe our editorial team will commit to work hard to improve the quality of submissions, organize reviewing timetable and reduce the manuscript handling time that required for the review process. I think this would greatly reduce turnaround time from manuscript submission to final decision on acceptance or rejection.

There are many reasons to publish your significant findings in this journal:

- Published by the global Coalesce Research Group
- Covers all aspects of Chemical Sciences
- Fast times to publication mean rapid visibility for your work
- Articles are gold open access so that everyone can read
- Our board members root in five different countries and our reviewers are spread across the world.

In summary, I would like to take this opportunity to thank everyone who has contributed to the GJCS in a variety of capacities, and to urge you to submit your research findings

to publish in this journal. Your cooperation will be highly appreciated. If you have any questions and suggestions, please directly email to me or the journal coordinator at: cjchemistry@crgopentext.com. I look forward to hearing from you ASAP.
