

Editor note on Global Journal of Chemical Sciences

George Mihail Vlasceanu**University Politehnica of Bucharest, Romania.***Received Date: 26-12-2020****Published Date: 31-03-2021**

With gratitude and emotion, I address to you from the position of Editorial Board Member of Global Journal of Chemical Science, a role I adopted with both pride and excitement. As a researcher in Chemical Engineering in relation to Biomaterial Science and Tissue Regeneration, I find it exquisite to be among a global-spread group of specialists with interdisciplinary backgrounds and very pleased to introduce this new peer-review journal into a robust platform for sharing seminal contributions in Chemistry - an art among the sciences and a pillar for development in general.

Chemistry has become a crossroad area that raises academic, clinical and commercial interest contributing to the consolidation of industry vis-à-vis emerging niche activities. Temerarious studies are now aimed in the direction of bringing knowledge to the benefit of the masses, assisting in the process of bringing together industrial and clinical environments alike. Research finding have always proved to be the best strategy to improve, overall, the quality of life of millions and by supporting the dissemination of emergent discoveries, we at the Global Journal of Chemical Science will do everything we can to help researchers and clinicians achieve this and more.

The subject matter of this journal is assorted since chemistry governs all that surrounds us. In the widest sense, all related to chemical composition, structuration and morphology, physical nature and interactions with the environment, as well as the techniques involved in chemical investigation, processing or fabrication, is covered within our scope. Natural-science disciplines most harmoniously meet under the umbrella of chemistry which ranked as the foundation of the disciplines that are being nurtured for the purpose of serving man.

I believe that dedicated work in chemistry-related fields

is in itself a creative state of mind that expands beyond the prospects of one discipline, building in a more trans- and inter-disciplinary coverage mindset and eminent leading avenues in this area of expertise. Bold investigations of the unexplored can be soon acknowledged as pillars of the scientific developmental juncture where all dreams are possible but little was imagined. Concurrently, exploration beyond the limits of the unknown could readily drive towards the tangible unthinkable.

Global Journal of Chemical Science pursuits the doctrines of excellence, transparency and firm ethics with respect to publishing. All the articles are to be submitted via the online manuscript submission page and forwarded to unbiased professionals with no competing or conflict of interest, who follow solid ethical guidelines. The easy to use system the journal applies for submission enables the record of all editorial steps for a cursive and articulate process.

By welcoming valuable contributions from the trans-sectorial fields of chemistry research, we will be permanently up with the new paradigms implemented with priority on a global scale in order to uphold the latest developments in multidisciplinary field of biotechnology and biomedicine, but without being limited to it. It is our intention to cultivate an environment of knowledge within the reach of all which after serious consideration was adopted as our mission. Hence, this journal aspires to be an engaging and vibrant mean to encompass high yield information as a strategic platform towards increasing the visibility of preeminent and reliable scientific works, promoting innovation and connecting

potential scholars from all around the world into an elite network.

Needless to stress that the manuscripts you intend to submit will make great contributions to the early stage development of the journal and will dictate the future success of the publication. The board also welcomes you to forward suggestions meant both to improve our effort to ease the publication process and to refine the relationship between the publishers and the authors into a casual partnership in the interest of sharing the knowledge.

I would also like to reiterate my gratitude for the opportunity to be an editor and look forward to your unrelenting support to publish the first issue of shortly. Greetings and thank you in advance for your contribution to Global Journal of Chemical Science. George Mihail Vlasceanu, Editor, Researcher, University Politehnica of Bucharest, Romania.
